

In the Specification

Applicants' previous response filed on 21 August 2008 included the amendment to the specification, as set forth below.

Please amend the specification by deleting the originally filed paper copy of the Sequence Listing and entering the substitute paper copy enclosed herewith. The substitute copy includes newly listed sequences 26 and 27 for polynucleotide primers, as required by the Examiner. The substitute paper copy of the Sequence Listing includes no new matter and is the same as that recorded in the enclosed computer readable format, a diskette.

On page 6, please delete the paragraph extending from line 4 through line 7, and substitute the amended paragraph set out below. The amendment adds no new matter and merely clarifies the language describing the figures.

FIGS. 1 A1 and 1A2, respectively, show the ~~nucleotide-sequence encoding for the polypeptide~~ nucleotides of SEQ ID NO:1, ~~referred to as Ana-o-2,~~ including a stop codon shown underlined and in bold; and the ~~polypeptide~~ nucleotides of SEQ ID NO:2, ~~which is a tail for the polypeptide of SEQ ID NO:1;~~
